

Cosmetic Website project

Description: Our project is to make a website selling cosmetics for men and women (makeup and care products). We resume our web site project in advanced web course and we add some more features as clients with an account having some advantages, a website manager ...

Use Case diagram (final): (spelling mistake: replace card by cart !)

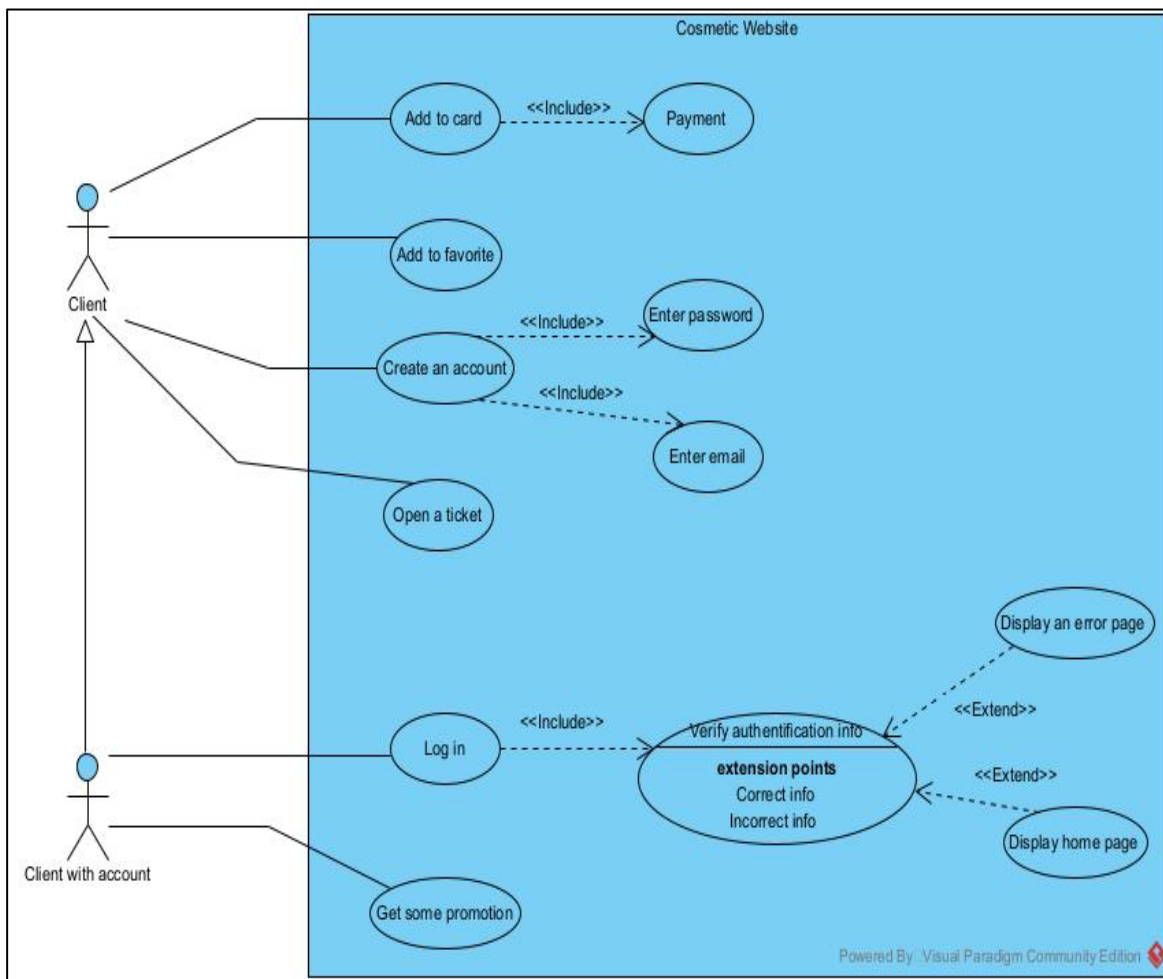

This is the Use case diagram for our whole project. It represents the process of users ordering something on the website including the check for the payment by the bank. It also includes customer services and website administration.

1)

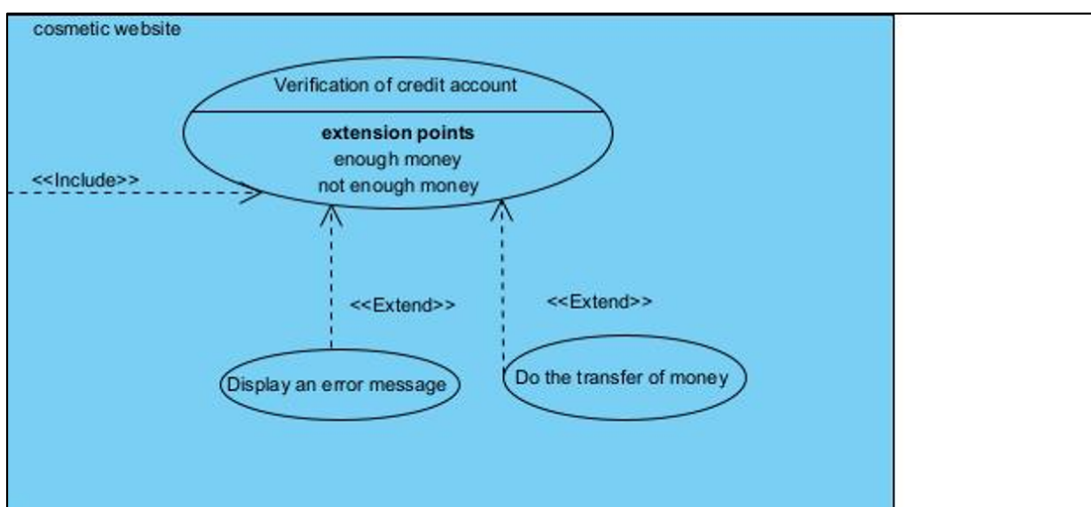

Client part (Noa Colin):

1.1)

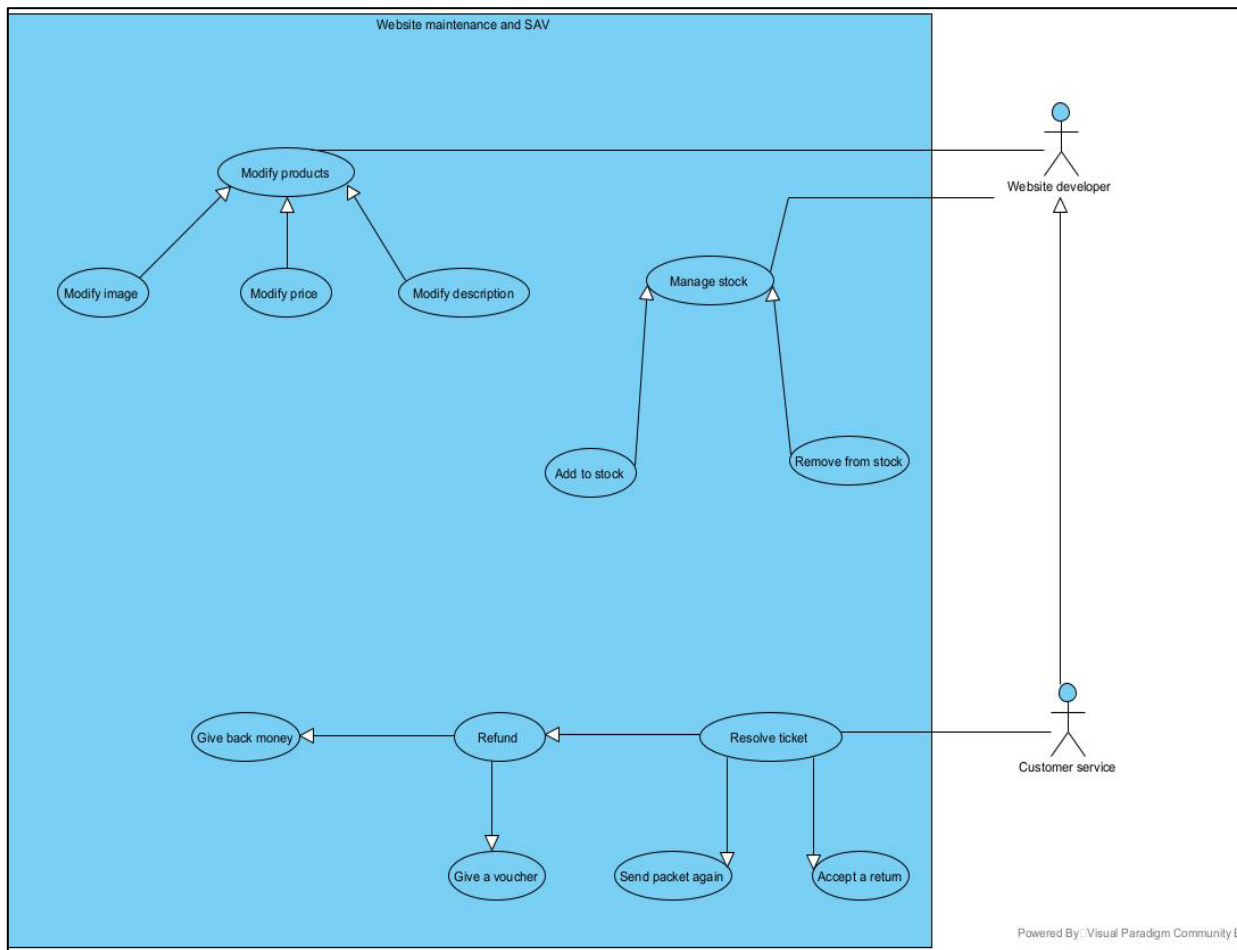

Service payment part (Léa Varing):

1.2)

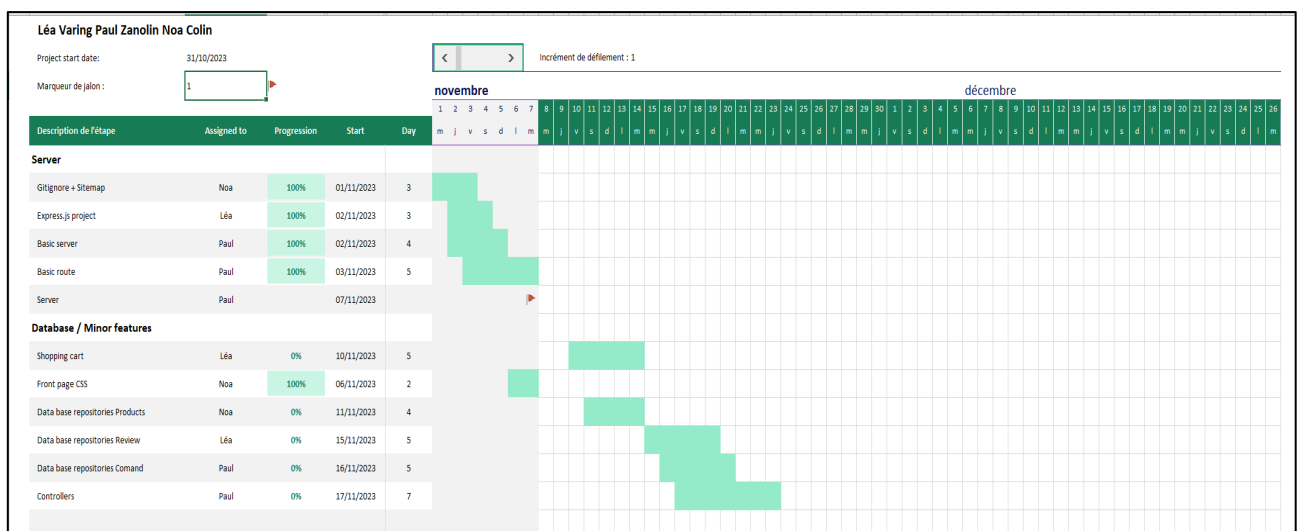

Website developer and customer services part (Paul Zanolin):
